Computational Statistics & Data Analysis 9 (1990) 343–344
North-Holland

# Author Index Volume 9 (1990)

(The issue number is given in front of page numbers).

**Abdous, B.,** Adapting the classical kernel density estimator to data (2) 169–178
**Arbia, G.,** On second-order non-stationarity in two dimensional lattice processes (1) 147–160
**Bartlett, R.F.,** see **B.C. Sutradhar** (1) 21– 35
**Breslow, N.E.,** see **J.B. Cologne** (2) 217–235
**Chin, D.C.,** see **J.C. Spall** (3) 297–307
**Christensen, G.S., S.A. Soliman** and **A. Rouhi,** Discussion of "An example showing that a new technique for LAV estimation breaks down in certain cases"* (2) 203–213
**Cologne, J.B.** and **N.E. Breslow,** A small sample simulation study of methods for log odds ratio regression analysis * (2) 217–235
**Frangos, C.C.** and **W.R. Schucany,** Jackknife estimation of the bootstrap acceleration constant (3) 271–281
**Greene, T.,** The depiction of linear association by matroids (3) 251–269
**Haslett, S.,** Degrees of freedom and parameter estimability in hierarchical models for sparse complete contingency tables (2) 179–195
**Herce, M.A.,** An example showing that a new technique for LAV estimation breaks down in certain cases * (2) 197–202
**Herce, M.A.,** Some comments on Christensen, Soliman and Rouhi's "Discussion..." * (2) 215
**Joss, J.** and **A. Marazzi,** Probabilistic algorithms for Least Median of Squares regression (1) 123–133
**Kachlicka, D.** and **S. Mejza,** Incomplete split-plot experiments-whole-plot treatments in a row-column design (1) 135–146
**Kettunen, J.,** see **O. Varis** (1) 77– 91
**Marazzi, A.,** see **J. Joss** (1) 123–133
**Martin, R.J.,** Some results on the $\Phi_p$-value when errors are correlated (1) 113–121
**der Megreditchian, G.,** Meteorological networks optimization from a statistical point of view (1) 57– 75
**Mejza, S.,** see **D. Kachlicka** (1) 135–146
**Parrish, R.S.,** Generating random deviates from multivariate Pearson distributions (3) 283–295
**Provost, S.B.,** Estimators for the parameters of a multivariate normal random vector with incomplete data on two subvectors and test of independence (1) 37– 46
**Rafajłowicz, E.,** Optimum input signals for parameter estimation in systems described by linear equations (1) 11– 19
**Rossi, C.,** Survival analysis and prognosis: A comparison of three approaches (for the analysis of nasopharinx data) (1) 93–111
**Rouhi, A.,** see **G.S. Christensen** (2) 203–213
**Salvan, A.,** Planning sequential clinical trials: A review (1) 47– 56
**Schucany, W.R.,** see **C.C. Frangos** (3) 271–281
**Sirviö, H.,** see **O. Varis** (1) 77– 99
**Soliman, S.A.,** see **G.S. Christensen** (2) 203–213
**Spall, J.C.** and **D.C. Chin,** First-order data sensitivity measures with applications to a multivariate signal-plus-noise problem (3) 297–307

0167-9473/90/$03.50 © 1990 – Elsevier Science Publishers B.V. (North-Holland)

**Sutradhar, B.C.** and **R.F. Bartlett,** An empirical study of the estimation of eigenvalues in connection with non-negative estimation of variance components of a one-way random effect model (1) 21– 35

**Uspensky, A.B.,** Some new aspects of analysis and design of experiments in inverse problems of remote meteorological sounding (1) 1– 10

**Varis, O., J. Kettunen** and **H. Sirviö,** Bayesian influence diagram approach to complex environmental management including observational design (1) 77– 91

* Appeared in Section II (Applications and Comparative Studies). All others: Appeared in Section I (Methodology).

MicrOsiris for the PC (1) 166
MINITAB introduces advanced features (1) 165
SIR/Easy (1) 167
SPSS announces Macintosh package (1) 161
SPSS teams with IBM (2) 245
SPSS introduces SPSS/PC + V3.1 (2) 245
SYSTAT announces new Mac Mystat (1) 161
SYSTAT announces data transfer package for IBM compatibles (1) 162
SYSTAT announces EzPATH for IBM compatibles (1) 163
SYSTAT announces SETCOR for IBM compatibles (2) 246
SYSTAT announces software for DEC VAX/VMS (2) 247
